Multiply the rate of subscription with the figure shown below the month in which the subscription is commenced, and allow interest on that sum at the rate current for the year with the aid of the interest table.

Example:

Rate of subscription is Rs. 20. Payment commences in May and is continued till the end of the year.

Interest: $20 \times 66 = Rs.$ 1,320.

Multiply the rate of subscription with the figure below the month in which the last instalment is paid, and allow interest on that sum at the rate current for the year with the aid of the Interest Table.

Example:

Rate of subscription Rs. 20. Last instalment paid in September.

Interest: $20 \times 57 = \text{Rs. } 1,140.$

ALTERNATIVE METHOD OF CALCULATING INTEREST ON A SINGLE SUM DEPOSITED OR WITHDRAWN IN ANY ONE MONTH.

Multiply the rate of subscription with the number of months remaining in the year including the month in which the deposit or the withdrawal is made, and allow interest on that sum at the rate current for the year with the aid of the interest table.

Example:

Rate of subscription is Rs. 20, deposited in October.

Interest: $20 \times 6 = \text{Rs.} 120$.
